BINOCULARS INSTRUCTION MANUAL UX1050BI

General Safety

Read this manual thoroughly before you start using the product.

Store this manual, the completed warranty card, your receipt and the product packaging. The safety precautions instructions reduces the risk of fire and injury when correctly complied to.

Please follow all instructions and take notice of all warnings.

To reduce the risk of injury:

- Keep out of reach of children.
- Do not allow metal objects to touch or pierce.

CAUTION:

- Do not watch the sun directly by using binocular to avoid harm/damage to your eyes.
- Do not turn the diopter adjustment hand wheel in overexerting, stop to turn when it reach the limited position, otherwise the eyepieces assembly can be damaged!
- Be careful to move the binocular to avoid overexerting or collision.
To avoid the heavy vibration when you take it.
- Do not tamper or change or modify the product in any way.
- Only use Accessories outlined and recommended by the manufacturer.
- Please do not place any object on top of the product including objects filled with liquids such as vases.
- Do not touch the lens by hand, be careful to protect the lens not to be injured by hard substance.
- Please fold the Interpupillary adjustment in lowness, put on the lens cover and put into the soft bag when you do not use it.
- Do not clean the lens by hand, oilcloth, paper. Lens cloth should be keep in cleanliness in the binocular bag. Once the lens polluted by oil, please use the soft cotton cloth or silk to clear it with a little industrial alcohol.

HOW TO USE

1. Adjusting the Eyepieces to your eyes (interpupillary distance)

Hold the binoculars with both hands. While looking at a distant object, carefully move the binocular tubes downward or upward until left and right fields are correctly aligned, forming a perfect circle.

If the interpupillary distance has not been properly adjusted, the image might be uncomfortable to view.

2. Adjusting for differences between the sight of each eye (Diopter adjustment)

- A. Focus with your left eye by focusing ring. Look at an object through the left eyepiece with your left eye. Rotate the focusing ring until you see a sharp image of it.
- B. Focus with your right eye with diopter adjustment ring on the right eyepiece. Look at the same object through the right eyepiece with your right eye. Rotate the diopter adjustment ring (usually located on the right eyepiece) until you see a sharp image.

* If the diopter adjustment is located on the left eyepiece, follow the procedure above in reverse order.

* If you use zoom binoculars, set them at the maximum magnification first. Then focus with the diopter adjustment ring.

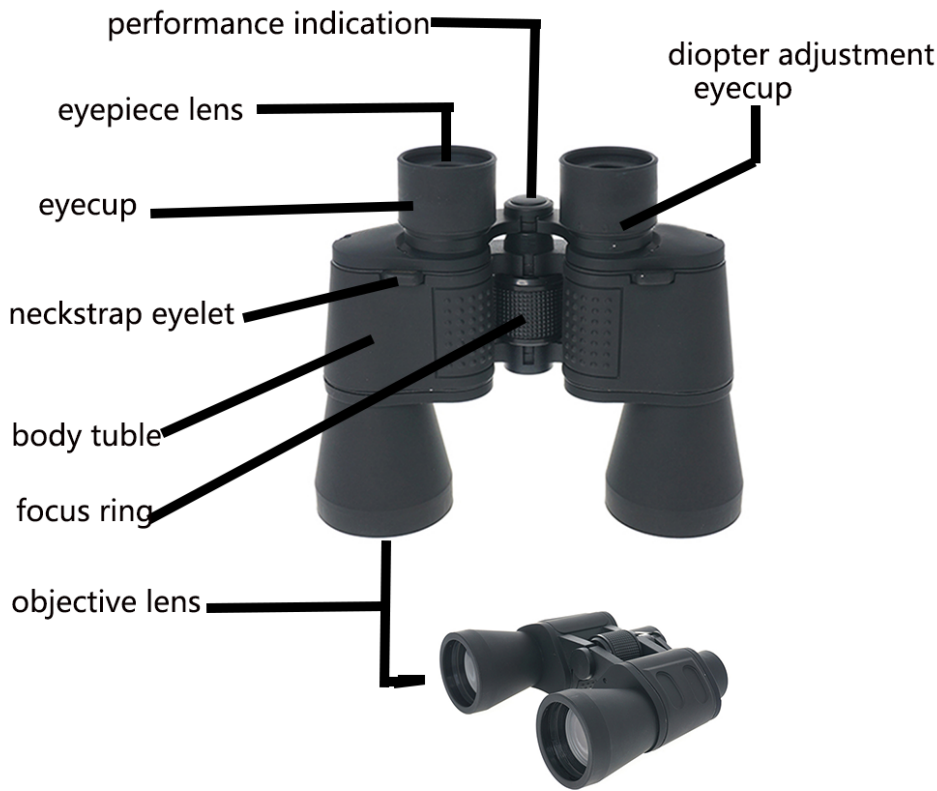

3. Focus with focusing ring

Focus on an object by rotating the focusing ring. If the diopter has been adjusted, turn the focusing ring to focus whenever you change the object viewed.

Storage:

Please put in the dryness place when you do not use it in long time.
